

WoofCoin Whitepaper

1. Introduction

WoofCoin is a clicker-based WebApp game developed for Telegram, aiming to deliver a fun, engaging, and community-driven experience. Users earn WoofCoins by tapping, completing tasks, and inviting friends through referrals.

2. Key Features

Click to Earn: Tap to generate WoofCoins over time.

Tasks System: Complete daily and weekly challenges to boost rewards.

Referral Program: Invite others and earn bonuses for each new user.

TON Wallet Integration: Connect your wallet with TON Connect for secure storage and transfers.

Cloud Sync: All progress is stored securely in the cloud and tied to your Telegram account.

3. Token Utility

WoofCoins can be used to:

Unlock upgrades and boosters in the game

Participate in events and limited-time challenges

Exchange for other in-game assets

4. Vision

Our goal is to create a fun, addictive, and rewarding ecosystem that blends casual gaming with real user incentives. WoofCoin will continue evolving with community feedback and new features.

5. Roadmap

Q1: Game launch, basic features, and referral system

Q2: TON Wallet support, new tasks, and leaderboard

Q3: Mini-games, marketplace, and NFT integration

Q4: DAO development and community voting
